hand-cut stone mosaics

Environment Miljö Ympäristö

For several years already our mosaics are attached to mesh using only water based, environmentally friendly adhesives. The mesh we use is made of glass fiber, which has a lower impact on the environment than plastic mesh. As of 2019 100% of our boxes are made from unbleached cardboard and are folded rather than glued. We also no longer use plastic 'windows' in our packaging, eliminating the use of plastics completely. 100% of the pallets we use during transport are made from recycled materials. And of course we continue to strive for improvements and community awareness on environmental issues.

Redan under många år har vi limmat våra mosaiker på nät med vattenbaserat och miljövänligt lim. Näten vi använder är av glasfiber som har mindre miljöpåverkan än plastnät. Från och med 2019 är alla våra kartonger producerade av oblekt kartong som viks i stället för att limmas. Vi använder heller inte längre plastfönster i våra förpackningar och har därmed helt och hållet gått bort från användandet av plast. 100% av de pallar vi använder är gjorda av återvunnet material. Och vi fortsätter naturligtvis att sträva efter förbättringar och ökad medvetenhet i samhället om miljöfrågor.

Jo vuosia mosaiikkimme on kiinnitetty verkkoon vain vesipohjaisilla, ympäristöystävällisillä liimoilla. Käyttämämme verkko on valmistettu lasikuidusta, jolla on pienempi ympäristövaikutus kuin muoviverkolla. Vuodesta 2019 lähtien kaikki laatikkomme valmistetaan valkaisuamattomasta pahvista ja ne taitellaan liimaamisen sijaan. Lisäksi emme enää käytä muovisia "ikkunoita" pakkauksissamme, joka poistaa muovin käytön kokonaan. Kaikki kuljetuksissa käyttämämme kuormalavat on valmistettu kierrätysmateriaaleista. Lisäksi tietenkin pyrimme edelleen tekemään parannuksia ja lisäämään yhteisön tietoisuutta ympäristöongelmista.

SYMBOLS

Walltile / Väggtegel / Seinä laatta

Floortile / Golvplattor / Lattialaatat

Suitable for floorheating /
Lämplig för golvvärme /
Soveltuu lattialämmitykseen

Frost and heat resistant /
Frost- och värmebeständigt /
Pakkas ja lämmönkestävä

Colour shade varies / Färgskuggan
varierar / Värisävy vaihtelee

Little to no colour variation /
Lite till ingen färgvariation /
Vähän vai ei väri vaihtoehtoa

Natural stone has considerable colour variations. So always check; take the tiles out of the box and mix various boxes to obtain most homogenous coloured surface.

Natursten har betydande färgbildningar. Så kolla alltid; ta brickorna ur skogen och blanda olika lådor för att få mest homogeen färgad yta.

Luonnonkivellä on huomattavia värikartioita. Joten tarkista aina; Ota laatat pois rungosta ja sekoita eri laatikot, jotta saadaan homogeenisin värillinen pinta.

Thickness +/- 2 mm
Tjocklek +/- 2 mm
Paksuus +/- 2 mm

Each piece is carefully cut by hand. We have very stringent quality control at our factory, but we do allow for a thickness variation of about 2 mm.

Varje bit skärs försiktigt för hand. Vi har mycket sträng kvalitetskontroll på vår fabrik men vi tillåter en tjockleksvariation på cirka 2 mm.

Jokainen pala leikataan huolellisesti käsin. Meillä on tehtaalla erittäin tiukka laadunvalvonta, mutta sallimme paksuuden vaihtelun noin 2mm.

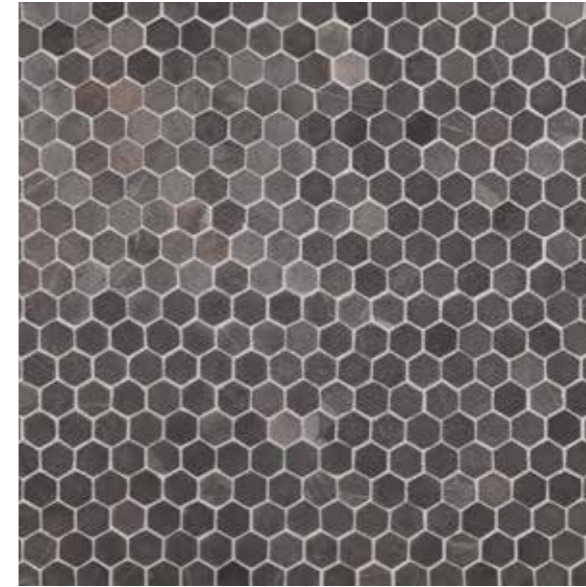

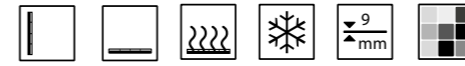

EVS-EN 12057

Installation and maintenance tips

for Qualitystone.info™ stone mosaics

When the mosaics are unpacked they are dusty from factory process and therefore appear lighter than on most pictures. After installation and during use, usually the color intensifies.

Qualitystone.info™ stone is suitable for all dry and wet spaces and in most cases can also be used outside. The mosaics are all cut by hand and therefore are more irregular in thickness and shape.

Natural stone has color variations which can be amplified if coming from different production batches. When doing a project make sure you buy enough for the entire space (floor/wall). Usually +15% on the m² is enough. +15% because you have to take into account cutting edges and possibly the odd breakage. Also make sure you install, clean and grout the entire project at once (floor or wall in one session)!

Before installing (gluing) make sure that all boxes are opened and mixed (!). Lay the mosaics out on a floor. Determine before (!) installing (gluing) if there are any color or shape variations that are not in accordance with your wishes. If so, inform your retailer.

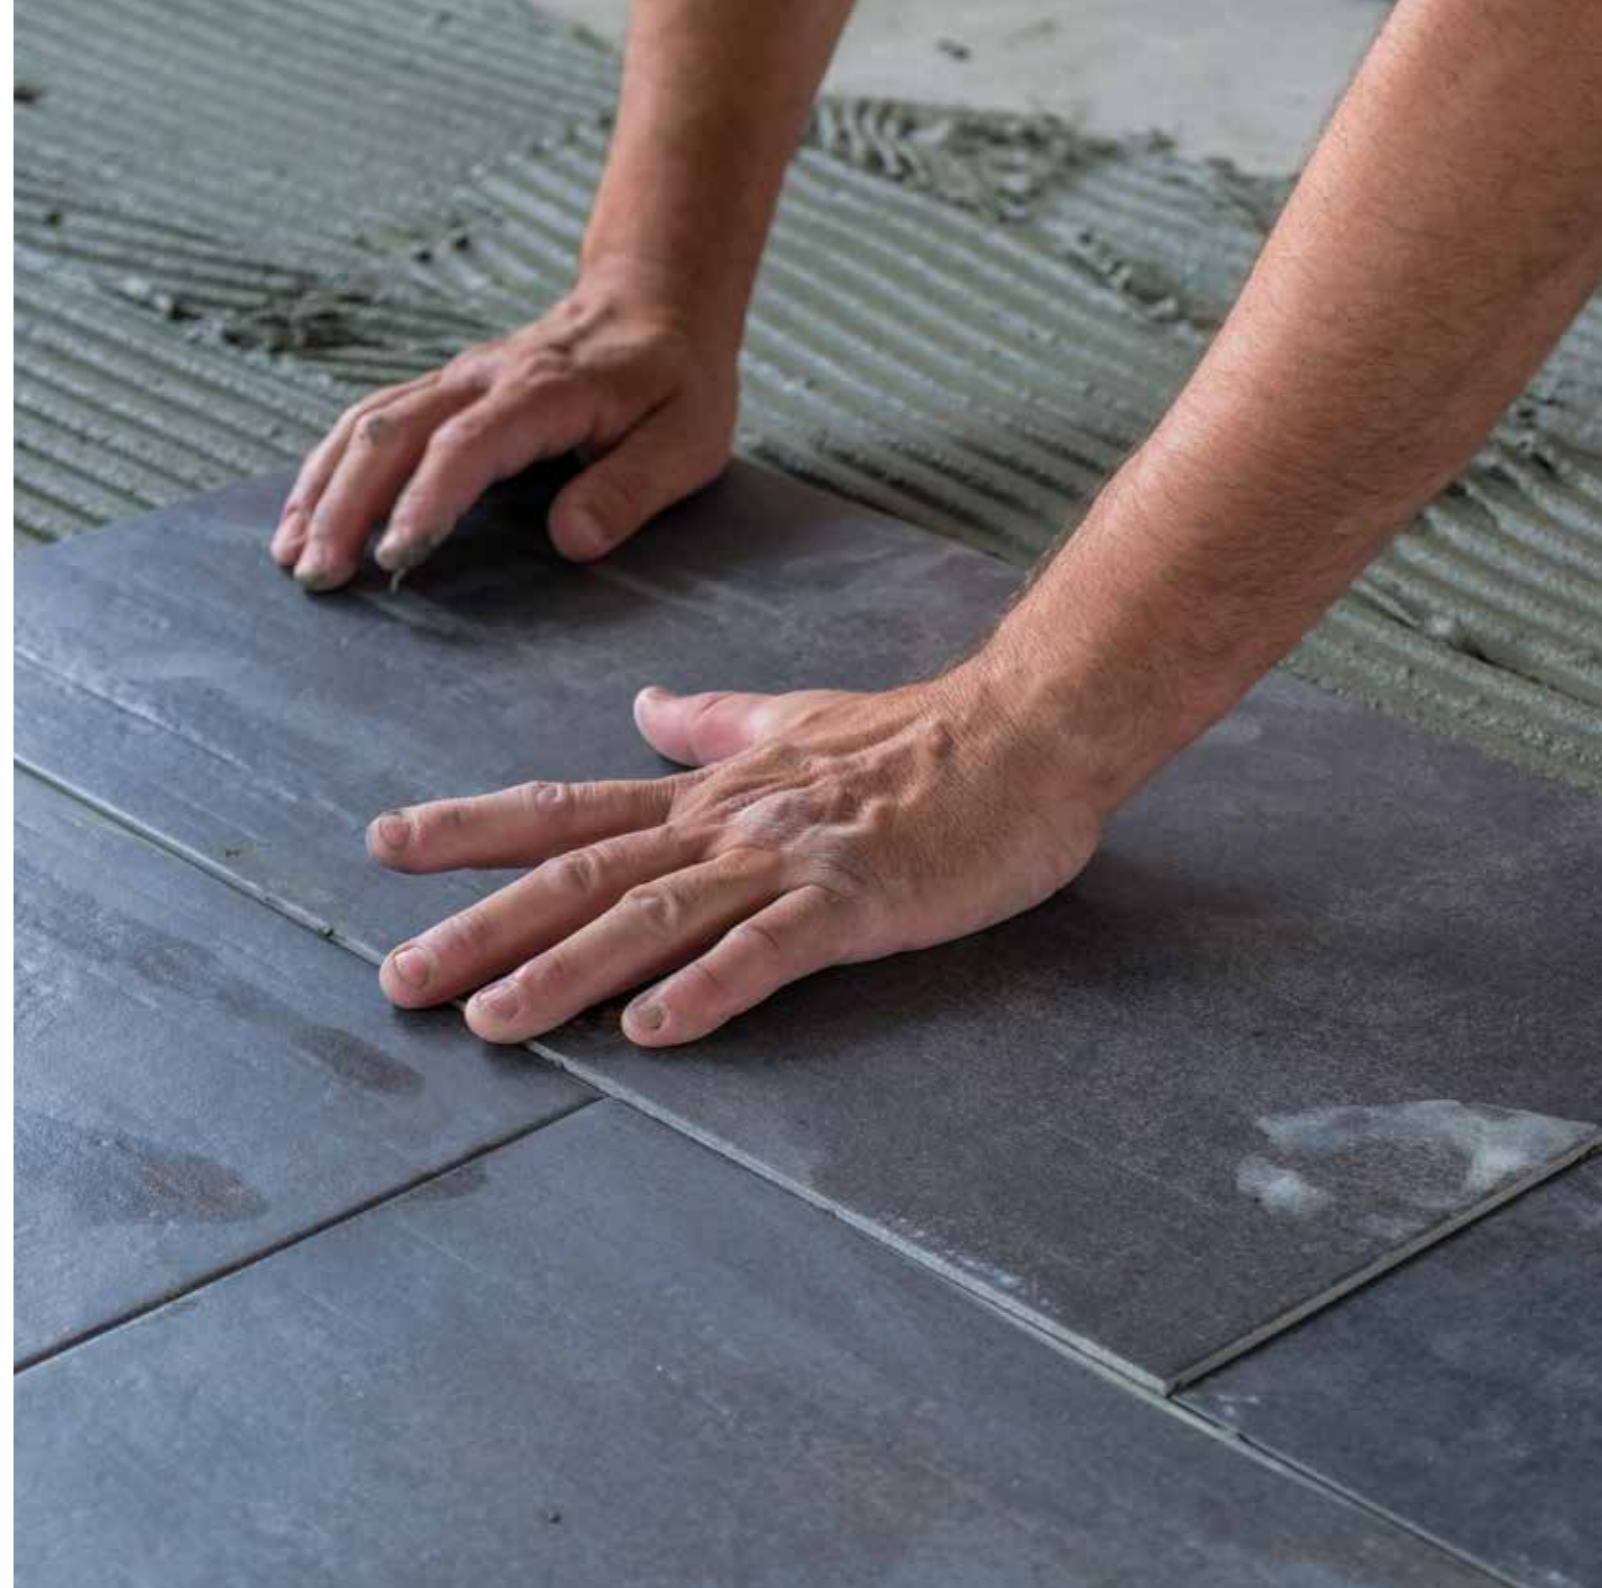

Apply a suitable adhesive for gluing. No special adhesive is necessary; just follow the advice of your retailer.

IMPORTANT:

- Use a relatively thick layer of adhesive with a rough comb: Allow the mosaics to 'float' so as to create the most even surface;
- After gluing, clean your mosaics from dust and residue;
- Allow plenty of time for the adhesive to dry completely;
- Before grouting apply a sealant (impregnator). This will help cleaning off excessive grout (joint filler) later and will protect your stone from stains etc.;
- Again: Allow for enough time for the sealer to dry. NB! Some stone (color) might absorb grout more quickly or dry more quickly: keep constant watch – do not leave over several hours!
- After applying grout (joint filler), start cleaning off the first excessive grout fairly soon (within 10-15 minutes). Follow general instruction for grouting;
- When grout is dry and mosaics are sufficiently clean, apply one or more layers of sealant. This will avoid cleaning problems in the long run.
- Daily maintenance can be done with simple luke-warm water.
- Never use acidic detergents; acids affect the calcium in stone. If strong stains have to be removed apply only light-acidic detergent and seal afterwards again.

Please feel free to contact your retailer or Qualitystone.info™ with questions.

Tips om sättning och underhåll

av Qualitystone.info™ stenmosaik

När mosaikerna har packats ut är de dammiga från tillverkningen och verkar därför ljusare än på de flesta bilderna. Efter sättning och användande kommer färgen vanligtvis att bli mer intensiv.

Qualitystone.info™ passar alla torra och våta utrymmen och kan i de flesta fall även användas utomhus. Mosaikerna har skurits för hand och är därför mera oregelbundna i tjocklek och form.

Natursten har färgvariationer som kan förstoras om de inte kommer från samma batch. När du ska utföra ett uppdrag bör du säkra dig att du köper in så att det räcker för hela utrymmet (golv/vägg). Normalt räcker det med 15% extra per kvadratmeter. 15% extra måste till eftersom det förekommer kapningar och något spill. Se till att du sätter, rengör och fogar hela projektet på en gång (golv eller vägg vid ett tillfälle)!

Innan sättning (limning) bör du se till att alla boxar har öppnats och blandats (!). Lägg ut mosaiken på ett golv. Innan (!) sättning (limning) måste du ta reda på om det finns några varianter av färg eller form som du inte tycker om. Om så är fallet, måste du meddela din återförsäljare.

Använd passande lim till limning. Det krävs inget särskilt lim – följ återförsäljarens rekommendation.

VIKTIGT:

- Applicera ett relativt tjockt lager lim med en grov tandspackel: Se till att mosaikbitarna "flyter" så att du får en så jämn yta som möjligt.
- Efter limning måste mosaikerna rengöras från damm och limrester.
- Låt limmet torka så länge att det torkar fullständigt.
- Innan fogning måste du applicera ett tätningsmedel (impregnering). Detta underlättar när du senare ska ta bort rester av fogmassa och kommer att skydda stenen mot fläckar osv.
- Återigen: Låt tätningsmedlet torka så länge att det torkar fullständigt. NB! Vissa stenar (färg) kan absorbera fogmassan snabbare eller torka snabbare: håll ögonen på processen – lämna inte projektet på flera timmar!
- Efter att du har lagt i fogmassan kan du börja att ta bort fogmassarester rätt så snabbt (inom 10-15 minuter). Följ vanliga instruktioner rörande fogning.
- När fogmassan har torkat och mosaikbitarna är tillräckligt rena bör du applicera ett eller flera lager av tätningsmedel. På så sätt undviker du rengöringsproblem på lång sikt.
- Dagligt underhåll utförs enkelt med ljummet vatten.
- Använd aldrig syrabaserade rengöringsmedel. Syra påverkar kalken i stenen. Om du måste ta bort kraftiga fläckar bör du endast använda svagt syrliga rengöringsmedel och sedan applicera tätningsmedel.

Kontakta gärna din återförsäljare eller Qualitystone.info™ om du har frågor

Qualitystone.info™-kivimosaiikin

Asennus- ja huoltovinkkejä

Kun mosaiikkilaattoja puretaan paketeista, niissä on vielä tehtaan pölyä, joten ne näyttävät vaaleammilta kuin useimmissa kuvissa. Väri voimistuu asennuksen jälkeen ja käytön aikana.

Qualitystone.info™ sopii kaikkiin kuiviin ja märkiin tiloihin, ja useimmissa tapauksissa sitä voidaan käyttää myös ulkona. Kaikki mosaiikit ovat käsin leikattuja, joten niiden paksuus ja muoto vaihtelee.

Luonnonkivellä on väri vaihteluita, joka korostuu eri tuotantoerien välillä. Varmista, että tilaat projektiasi varten riittävästi materiaalia koko tilaan (seinään/lattiaan). Yleensä 15 % lisää neliometriä kohti riittää. Tämä kattaa leikkausreunat ja mahdolliset asennuksen aikaiset rikkoantumiset. Asenna, pese ja saunaa koko projekti kerralla (seinä tai lattia yhdellä asennuskerralla)!

Varmista ennen asennusta (liimausta), että kaikki laatikot ovat avattu ja sekoitettuja (!). Lado mosaiikit lattialle. Tarkasta ennen (!) asennusta (liimausta), onko mosaiikeissa väri- tai muotovaihteluita, jotka eivät vastaa toiveitasi. Jos on, ilmoita asiasta jälleenmyyjällesi.

Käytä liimaukseen sopivaa kiinnitysainetta. Erikoisliiman käyttö ei ole tarpeen. Noudata jälleenmyyjältä saamiasi ohjeita.

TÄRKEÄÄ:

- Käytä suhteellisen paksua kiinnitysainetta ja harvapiikkistä laastikampaa. Anna mosaiikkien "kellua" saadaksesi mahdollisimman tasaisen pinnan.
- Pese mosaiikit liimauksen jälkeen pölystä ja liasta.
- Anna kiinnitysaineen kuivua kokonaan.
- Levitä pinnoitusaine (kyllästysaine) ennen saumausta. Tämä auttaa saumalaastijäämien pesua ja suojaa kiviä tahroilta ym.
- Muista: Anna kyllästysaineen kuivua riittävän kauan. HUOM! Osa kivistä (väristä riippuen) saattaa imeä saumalaastin nopeasti tai se saattaa kuivua nopeammin. Pidä sitä jatkuvasti silmällä äläkä jätä työtä valvomatta useiden tuntien ajaksi!
- Aloita saumalaastin pesu levittämisen jälkeen melko pian (10–15 minuutin sisään). Noudata tavanomaisia saumausohjeita.
- Kun saumalaasti on kuivunut ja mosaiikit ovat riittävän puhtaita, levitä vielä yksi kerros kyllästysainetta. Tämä helpottaa siivoamista myöhemmin.
- Normaali pesu voidaan tehdä kädenlämpöisellä vedellä.
- Älä koskaan käytä happamia pesuaineita. Hapot vaikuttavat kiven kalsiumiin. Jos kivistä pitää pestä sitkeitä tahroja, käytä kevyesti hapanta pesuainetta ja tee kyllästys uudelleen.

Qualitystone.info

Our company produces in Indonesia and acts as importer/wholesaler in the North of Europe. We make natural stone floor and wall coverings as well as wash basins and other stone products.

It is my aim to serve partners in all European countries. Together we aim to provide our clients and partners with the highest quality of hand-cut stone products, the best design, fastest delivery and strongest marketing support.

Yours sincerely,

Fons van den Hove

Shareholder & Manager

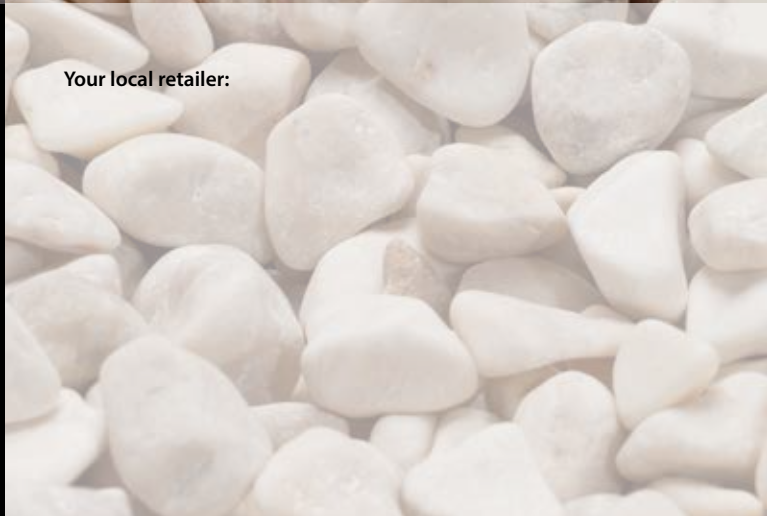

Many of the water taps and decorative items have been provided by Dekovabrik Ltd (Tallinn/Helsinki) and Vannistuudio Ltd (Tallinn). Both of these companies market a wide range of international, exclusive interior decorative items. I thank them for their support.

EVS-EN 12057

Although we try to show as accurate as possible the colors of all products: colors may vary. We strongly advise to have a professional install all tiles. All natural stone should be treated with a sealant before use. Copyright © 2018/2019 DBG Timber & Stone OÜ. All rights reserved.
