About

At NORR11 we strive to rethink Scandinavian design in order to create timeless furniture pieces. We seek inspiration from nature and raw materials, which is evident in our products that often redefine materials, techniques and forms.

Fusing together cultures from around the world with simple Scandinavian design principles, we generate a unique perspective on furniture design.

Our name stands for our Nordic heritage and the day it all began, the 11th of November 2011.

Welcome to NORR11.

NORR11

Welcome to the distillery

In a former military area next to Christiania in Copenhagen master distiller Henrik Brinks is on a mission to shake up the world of spirits. Henrik and his friends at the Copenhagen Distillery are driven by the desire to discover and have become known for creating spirits no one has ever created or even thought about before. They recently won the gold price for their Orange Gin and the master title for the Oak Gin making it one of the most wanted spirits in the world. The distillery's raw concrete floors, rustic walls and the spiritus infused atmosphere seemed like the perfect place for our photoshoot. Skål!

NORR11 Designers

Copenhagen based designers Kristian Sofus Hansen and Tommy Hyldahl work as a multi-disciplinary design studio across the fields of spatial, lighting, furniture and product design. Natural materials are the design-duos main sources of inspiration, which results in design that expresses clean lines, the beauty of natural material and the way it is produced. Everyday objects are turned into lasting personal mementos, focusing on the principles and processes found in nature, honest materials and quality design. Together Kristian & Tommy strive to combine their passion for Scandinavian tradition, Japanese simplicity and ethnic details in timeless pieces of design.

Kristian is a Danish designer operating from our design studio in Copenhagen. A graduate of the Royal Danish Academy of Fine Art (KADK) class of 2016, Kristian spent time in Japan studying at the Kyoto Institute of Technology. Kristian started collaborating with Tommy Hyldahl in 2016 but is a familiar face in the NORR11 family after having a design internship at the company in 2014.

Tommy is a founder and partner at NORR11 and has been involved in the creative direction of the company since the beginning. In 2011, Tommy pursued his passion for materials and product manufacturing when founding NORR11.

Kristian Sofus Hansen + Tommy Hyldal

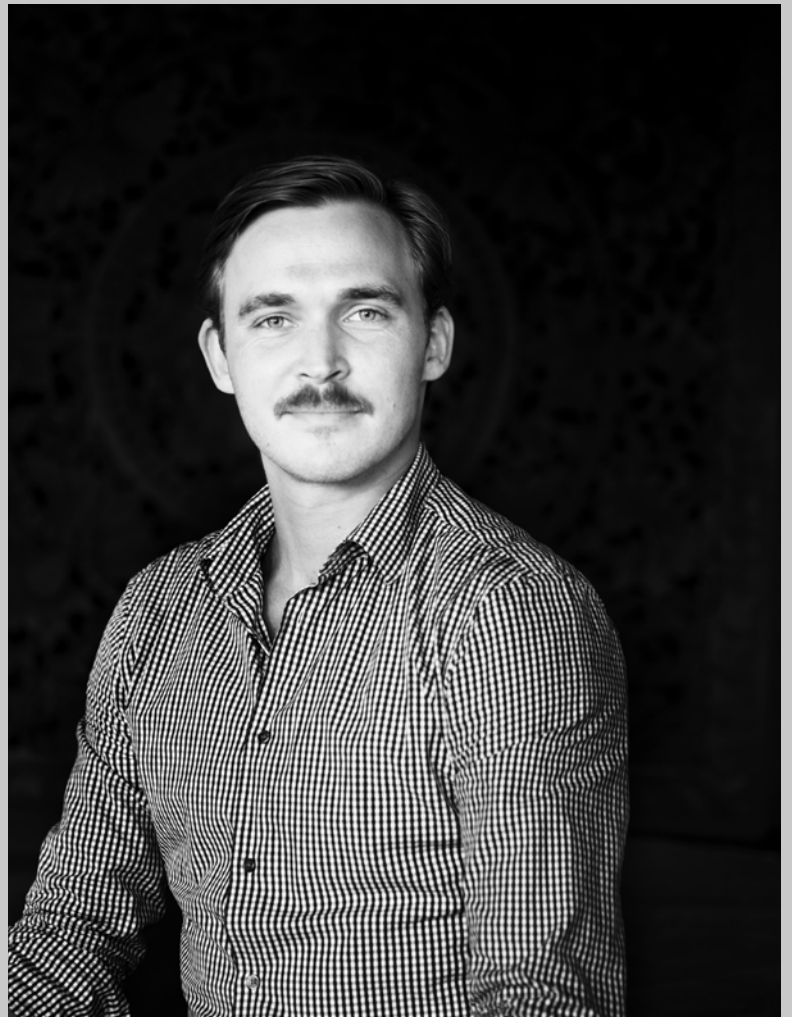

NORR11 Designers

For over 10 years Danish Rune Krøjgaard and Norwegian Knut Bendik Humlevik have formed a design and production team working for multiple Scandinavian design brands. In 2011 they launched their first collection for NORR11, a collection that grew to become a wide range of furniture, accessories and lights. Their work is characterised by high understanding for materials and organic and pure use of shapes. For them, simplicity, aesthetics and comfort are the key elements in their creations.

Rune is born in Herning in Denmark and a graduate of 'The Royal Academy of Fine Arts, School of Architecture' in Copenhagen. Rune's design is all about being able to 'see new possibilities' and finding 'the simplicity through the shape and dimension' of a body. Thus his objects are meant to 'complement the eye and the body' and create a 'relation between shape and space'.

Knut is born in Bergen, Norway and is like Rune a graduate of 'The Royal Academy of Fine Arts, School of Architecture' in Copenhagen. Knut has a great interest in the entirety and dynamics of his designs and creations, based on the material's natural ability. For him, design is seeing the balance in a product and trimming away all unnecessary details.

Elephant Chair

“With the Elephant Chair we aim to reinvent the classic wing chairs of Danish functionalism from the 1950’s but with a twist. The base is inspired by Japanese minimalist furniture, where each leg is designed as one single profile without visible joints. That gives the traditionally heavy lounge chair a light touch, which you will also see in the slightly curved seat and back. The Elephant Chair is a part of our new collection, which is based on the same foundation as our former collections; to work with natural materials, simple Scandinavian design, good craftsmanship and optimal comfort.”

Designer Kristian Sofus Hansen

Elephant Chair

The Elephant Chair, designed by Kristian Sofus Hansen and Tommy Hyldahl, is a modern interpretation of Scandinavian minimalism combined with Japanese aesthetics. The design is inspired by Danish upholstered chairs of the 1950's, while drawing visible characteristics from the already iconic Mammoth Chair. The result is a light and elegant lounge chair where the Elephant ear shaped back gently curves around the body providing superior comfort.

The Elephant chair is hand-crafted with a solid oak wood frame. The chair comes in three frame variations; natural, dark stained and black, and can be upholstered with leather and wool.

The seat and back are made from the highest quality compression molded oak veneer shells. The two shells are pressed in the same press mold, and surround the body in a light soft curve. The legs are designed as one single profile without any visible joints. This enriches the experience of the material strength and exchange between the light and heavy dimensions; "elegant and simple but sturdy without being clumsy".

Mammoth Chair

The Mammoth Chair has been our signature piece ever since we launched our first NORR11 furniture collection in 2011. Designed by the Danish designer Rune Krøjgaard and Norwegian designer Knut Bendik Humlevik, the Mammoth Chair is a welcoming modern wing chair. The wings extend outwards from the back of the seat, creating a pleasant homelike feeling.

Rune's passion for shapes and specific manufacturing techniques coupled with Knut's pursuit to create stylish yet functional furniture manifest themselves in the Mammoth Chair. The seat and back are formed from the same compression mold, giving the chair its signature clean minimalistic look. The high back, hugging wings and fluffy upholstery provide superior comfort and sense of privacy, whether relaxing at home or lounging with others.

The Mammoth Chair is hand-crafted, using solid oak wood for its frame and laminated oak veneer for the seat and back. The frame comes in multiple colour ways; natural, dark stained and black, upholstered in enormous variations of fabrics and leathers.

What's better than one Mammoth? Two Mammoths.

The Mammoth now accommodates both of you. Some call it a love-seat, we simply call it the Mammoth Sofa. It's an elegant piece of furniture with the comfort of a lounge chair but the size to fit at least two people. The welcoming wings envelop you in seclusion and serenity, making the Mammoth Sofa perfect for public spaces, hotel lobbies, offices or just a modern cozy home.

Pairing your Mammoth Sofa with a Mammoth Chair or another Mammoth Sofa are supreme ways of styling the Sofa. The Mammoth Sofa offers numerous possibilities of creating smart, intimate interiors with a warm and welcoming appeal.

The Mammoth Series is hand-crafted with a solid oak frame and seat and back of laminated oak veneer. The series comes in three frame variations; natural, dark stained and black and can be upholstered with a variety of leathers and fabric

Nomad

NORR11 is pleased to announce the launch of the Nomad lounge chair. Designed by Kristian Sofus Hansen and Tommy Hyldahl, the Nomad is a comfortable lounge chair made of bamboo wood with leather cushions.

“We wanted to create a light natural lounge chair of bamboo with the comfort of a traditional lounge chair. The biggest challenge was without a doubt creating the large back and seat frames and a back leg that runs all the way from the floor to the top in one whole piece. We worked on it with local craftspeople and skilled manufacturers. After countless experiments we ended up with a highly comfortable and stylish lounge chair” says designer Kristian Sofus Hansen.

The Nomad Chair is a Nordic interpretation of the traditional Moroccan wicker chair where the number of joints is reduced to its function only. The name “Nomad” is a characteristic contraction of the terms “Nordic” and “Moroccan”.

The seat and back are made of two large molded bamboo frames, with inlaid French bamboo mesh. The semi-transparent bamboo mesh gives the large surface a light expression and highlights the Nomad’s beautiful construction.

The chair comes with a neck pillow with three height variations, as well as a seat cushion for optimal comfort. Both pillows are produced in leather, which compliments the warm bamboo of the Nomad.

Goose

The idea of the Goose Lounge Chair, based on the Langue Chair, was to create a highly comfortable lounge chair that is small enough to fit into any kind of interior space. Its beautiful fabric and leather make it suitable for a hotel suite or complimenting a sofa in a private home.

The soft seat is contrasted by two pointing oak veneer legs crossing beneath the seat. The legs are available in natural oak, dark stained and black. The wide range of upholstery options include velvet, sheep skin, vintage leathers from Sorensen and various types of Kvadrat materials to personalise the chair.

Langue

The Langue series is our most versatile furniture series with nearly unlimited potentials of combinations. It started as an idea to create a simple chair with a soft minimalistic appearance from a molded plastic seat and a frame of beech wood. A highly tasteful and functional shell chair at an attractive starting price to suit different stages of peoples lives. Today, the series includes dining chairs with eight possibilities of legs in both wood and steel, lounge chairs and the latest addition, a bar chair in two heights and the seat of the dining chair making it a very comfortable bar chair. With the wide range of possible combinations of frame, shell colours and upholstery options, the Langue Chair can be customised to each and every scenario without compromising its basic concept.

Since we launched the Langue series it has been under constant development, making little tweaks here and there to achieve the best and strongest chair possible. The result is a beautiful, sturdy chair suitable for private homes and public settings.

NYII

Inspired by traditional Danish elementary school chairs, the NYII Dining Chair has a frame hand-crafted from solid oak and a seat of laminated oak veneer. The Chair came to life when designers Rune Krøjgaard and Knut Bendik Humlevik went on a mission to create a modern take on the Scandinavian dining chair. Just like a school chair it had to be both comfortable and very durable. The result is a simple and honest chair with a timeless expression.

The NYII series also includes bar chairs in two heights, 65 cm and 75 cm, designed to fit perfectly to a kitchen island in a private home or as a comfortable bar chair in public spaces.

The visible grains in the chair's structure emphasise the quality of the materials and give it a natural appearance. The chair is available with a seat cushion upholstered with leather and the frame comes in natural, dark stained and black.

NORR11 is proud to announce the relaunch of the Shanghai Dining Chair. Designers Rune Krøjgaard and Knut Bendik Humlevik, along with NORR11 founder and partner Tommy Hyldahl, went on a quest to China looking for inspiration to design a modern Scandinavian take on the ancient Chinese Horseshoe Chair.

It can be said that the design goes more than 700 years back, as they found an armrest on a chair dating back to the Yuan Dynasty, a period where Marco Polo was still in China. This became the inspiration for the Shanghai Chair. They started working with talented craftspeople and through trial and error, tweaking small details over the years, the final result is a distinctively modern take on the Yuan Dynasty's Horseshoe chair.

The Shanghai chairs were one of the first chairs produced by NORR11. The Shanghai Chair was originally produced in Asia to preserve the original production methods of connecting solid wood pieces using woodworking joints and rarely using any glue or nails. In 2017 production was moved to Europe and the Shanghai Chair was reintroduced to the market.

Shanghai

Designers

Rune Krøjgaard + Knut Bendik Humlevik

The Shanghai Chair features a steam bent solid ash wood frame and a seat of handwoven paper cord or leather. The back and the armrest play a central role in the chair's construction, giving it an iconic shape and firm support. The high back provides comfortable support and the armrest effortlessly surrounds the body of the chair. The paper cord seat is hand-woven and the leather upholstered seat option comes with Premium or Vintage Leather from Sorensen Leather.

“It’s still one of the designs I’m the most proud of having designed. Not only by the looks, but the effort and work which we put in to the chair. From our drawings to the final chairs, damn, there was a lot of changes and modifications.”

Goose

NORR11 is proud to announce the launch of the Goose Dining Chair. A fully upholstered dining chair designed by Kristian Sofus Hansen and Tommy Hyldahl.

The Goose Dining is a series of luxurious fully upholstered dining chairs based on the same frame options as our Langue series. The seat has a carefully selected 3 centimetres foam, with an ideal balance between comfort and posture, making the chair perfect for those long evenings of dining. For the launch of the first Goose Dining chairs we handpicked three colours of vibrant, soft velvet. The three colours, Taupe, Rosewood and Midnight Blue, fit beautifully with the brass and black bases. The Goose Dining Chairs are also available with the Original wooden base, Avantgarde steel base and with a wide selection of leathers and fabrics upholstery options.

Madonna Sofa

Designed for pure comfort the Madonna Sofa is a modular sofa built with a strong core of plywood and high quality cold cure foam. With a deep seat and a low lounge feel frame the Madonna Sofa encourages relaxation. The design has a clean look, making it easy to compose and decorate with pillows and blankets. The 8 different modules provide numerous possibilities to create the ideal sofa for each individual space, from a regular two-seater to larger L-shapes and chaise lounge options.

The Madonna comes fully upholstered in Canvas, Medley and Velvet fabrics and every sofa is made-to-order.

Designers

Rune Krøjgaard + Knut Bendik Humlevik

MAN

Inspired by the Bauhaus era where simple and clean shapes were in focus, the MAN Series is a collection of furniture with clean expression. Minimal materials and a functional design philosophy make the MAN Series aesthetically pleasing. The frame is made in Denmark from stainless steel and the seat and back are made of reinforced canvas. The cushions are upholstered with high quality leather and filled with fine down filling.

The series consists of two- and three-seater sofas, lounge chair, daybed, chaise longue, coffee table and side table. The leather cushions come upholstered with various types of leather hides from Sorensen Leathers and the tables come with a fine black marble from the Iberian peninsula or a veiny green Indian marble.

The Macchiato Sofa is an asymmetric modular sofa, with a high content of down feathers and upholstered with elegant fabrics. The Macchiato Sofa is all about the quality of the fabrics and comfort, challenging the common square modular sofa. The unique combination foam, memory foam and down feathers ensure that the sofa aligns to your body perfectly. The seats are low and deep allowing for the ultimate lounge feeling when socialising or relaxing. All modules come with accompanying pillows that welcome you to the sofa even before you sit down.

The 8 different modules can all be used individually as they are fully upholstered with

a solid core. They can also be connected with other modules using the Click-Link system underneath the sofa, creating various types of sofas fitting larger environments or smaller ones.

The Macchiato Sofa comes upholstered with various fabrics and every sofa is made-to-order.

Rough Table

In a desire to create a natural and raw dining table, bringing life and character to the living room, we created the Rough table. The Rough table is made of a single solid piece of Suar with a thickness of between 10-12 centimetres and width from 80 to 120 centimetres. Suar is a common type of tree in Asia that can grow up to 25 meters high. All wood used for the Rough tables is certified and inspected. Our craftspeople carefully handpick each and every tree before cutting them down to 2.2, 3 or 4 meter slabs. Depending on the humidity, the slabs are allowed to dry for up to four months. Once dry, each table top is hand sanded and hand buffed with leather, making the table lovely and smooth. Natural cracks and holes will appear, some of which we repair and fill and others that we leave as beauty marks on the table.

The non-linear form reflecting the natural growth of the tree and the beautiful grainy pattern of the Suar makes each piece unique. The grain of the wood runs beautifully through the table and sprouts of branches and texture of the bark can be visible. To make sure you get your dream table we give everyone an option of at least three different table tops to choose from.

The Rough Table is a table for life, durable and strong, easy to maintain and optimal for either inside or outside settings. The Maiden Table legs partner well with the Rough table with their curved design and slim profile.

Kristian Sofus Hansen + Tommy Hyldahl

NORR11 is proud to present the Y frame by Kristian Sofus Hansen and Tommy Hyldahl.

The table legs are designed as a square frame that unfold in a triangular geometry underneath the table top. With the use of 12 mm thin steel profiles, a dynamic variation is created between the flat surfaces and the slim Y silhouette. The legs are designed to complement our Charcoal table tops and other simple dining or desk table tops.

The Y frame is an ultra-simple and sleek solution for any table top made with high quality stainless steel and finished in a matte black powder coat.

Y Frame

Duke

The Duke tables are a series of multi-functional side and coffee tables with a spun metal tray loosely placed on top of a metal frame. The tray comes with rubber underneath to prevent it from slipping off. The tables come in small, medium and large and can easily be adapted to fit your needs, with the medium size particularly functional. The base can be rotated onto its different faces to create three different table heights, making them suitable to fit any height of sofa or to be used as a bedside table. When all three sizes are placed together they create a nice landscape that compliments any sofa.

Ghost table

Ghost

Ghost Coffee Table by Kristian Sofus Hansen and Tommy Hyldahl is a solid table in cast aluminium. The elegant table is cast with three pointy legs and table top with a groove in the outline that beautifully highlights the qualities of the material.

The table is removed directly from the mold without polishing, which gives each table a unique rough surface with the texture of the mold. The black-painted table has a beautiful and diverse surface, with alternation between a matte and reflective finish.

Designers

Kristian Sofus Hansen + Tommy Hyldahl

JFK

Designers

Kristian Sofus Hansen + Tommy Hyldahl

We are proud to announce the launch of the JFK Desk, the first desk from NORR11, designed by Kristian Sofus Hansen and Tommy Hyldahl.

Drawing inspiration from the late 50s, beginning of 60s era of Mad Men office desks, the JFK desk has a slim table top with three built in drawers. The drawers have a height of 4 cm making enough space for a laptop, papers and other things you might need to store in a modern desk.

The drawers have elegant knobs made from aluminium with inspiration from old volume knobs from the Jaguar cars.

A unique attribute of the desk is that there is a built in space for a power supply to connect a computer, printer or a smartphone charger. The power supply connects through one of the aluminium legs making sure that power cables don't disturb the overall clean appearance of the desk.

The matt black powder coated aluminium legs meet in the middle underneath the table top forming a conic shape giving the desk a light and elegant expression. The table tops come in black oak veneer or palisander veneer with a stunning pattern.
